Year	*Quantity (Tonnes)*	*Value (Rs. in crore)*
1988-89	33,971	273.68
1989-90 (Prov.)	45,807	365.07
1990-91 (Prov)	46,812	441.40

(c) The estimates of cashewnut yield for different countires is not available. However, the yield in India during 1990-991 is 634Kg/ ha.

(d) For increasing the yield of cashewnut in India both Research and Development measures are undertaken. The ICAR has evolved 22 improved varieties of cashewanut and developed effective control measures for Tea-mosquito and other pests of cahsew.

The development measures being implemented for increasing yield of cashew under the Central Sector Intergrated Programme for development of cashew,, include:-

(i) Improvement of cashew by vegetative propagation and establishment of Scion Banks for production of grafts.

(ii) Planting new area with clonal material.

(iii) Adoption of plant protection measures. (iv) Demonstrations for popularing clonal cultivation.
